Contents of Volume 25, 1986

Number One

The IBM 3090 system: An overview 4
S. G. Tucker

IBM 3090 performance: A balanced system approach 20
Y. Singh, G. M. King, and J. W. Anderson

Engineering and scientific processing on the IBM 3090 36
D. H. Gibson, D. W. Rain, and H. F. Walsh

The IBM System/370 vector architecture 51
W. Buchholz

Vector system performance of the IBM 3090 63
R. S. Clark and T. L. Wilson

The System Usability Process for Network Management Products 83
K. D. Gottschalk

Network management software usability test design and implementation 92
L. C. Percival and S. K. Johnson

Improving availability of software subsystems through on-line error detection 105
L. Koved and G. Waldbaum

Workstations and mainframe computers working together 116
J. K. Kravitz, D. Lieber, F. H. Robbins, and J. M. Palermo

Number Two

Introduction to IBM's knowledge-systems products 134
A. J. Symonds

Knowledge-based systems in the commercial environment 147
E. D. Hodil, C. W. Butler, and G. L. Richardson

YES/MVS and the automation of operations for large computer complexes 159
K. R. Milliken, A. V. Cruise, R. L. Ennis, A. J. Finkel, J. L. Hellerstein, D. J. Loeb, D. A. Klein, M. J. Masullo, H. M. Van Woerkom, and N. B. Waite

The genesis of a knowledge-based expert system 181
J. A. Voelker and G. B. Ratica

Prolog for applications programming 190
W. G. Wilson

The numeric representation of knowledge and logic—Two artificial intelligence applications in medical education 207
W. D. Hagamen and M. Gardy

The Portable Inference Engine: Fitting significant expertise into small systems 236
N. A. Burns, T. J. Ashford, C. T. Iwaskiw, R. P. Starbird, and R. L. Flagg

Computer processing of dates outside the twentieth century 244
B. G. Ohms

Numbers Three and Four

Systems architecture in transition—An overview 256
H. Lorin

Impact of memory systems on computer architecture and system organization 274
R. E. Matick

Computing as a tool for human augmentation 306
W. J. Doherty and W. G. Pope

IBM small-system architecture and design—Past, present, and future 321
G. G. Henry

Software engineering: An emerging discipline 334
R. Goldberg

Tools for building advanced user interfaces 354
J. L. Bennett

Open Systems Interconnection 369
J. R. Aschenbrenner

An advanced voice/data telephone switching system 380
J. M. Kasson

The evolution of printers and displays 399
A. F. Mayadas, R. C. Durbeck, W. D. Hinsberg, and J. M. McCrossin
